#### Across

- 2 The colour of the biggest whale on Earth
- 5 These flow like rivers
- 6 The smallest and coldest ocean
- 8 This spills into the ocean from ships
- 9 Large rocky areas made of coral
- 10 They change twice a day. Scientists think this is caused by the pull of the sun and moon on Earth

#### Down

- 1 Oceans and lakes play an important part in this
- 3 The largest of the four main oceans
- 4 A bird heading south for the winter
- 7 This is the coldest, most north-west state of the USA

### Spot the difference?

There are six differences between these two pictures. Can you spot them all?

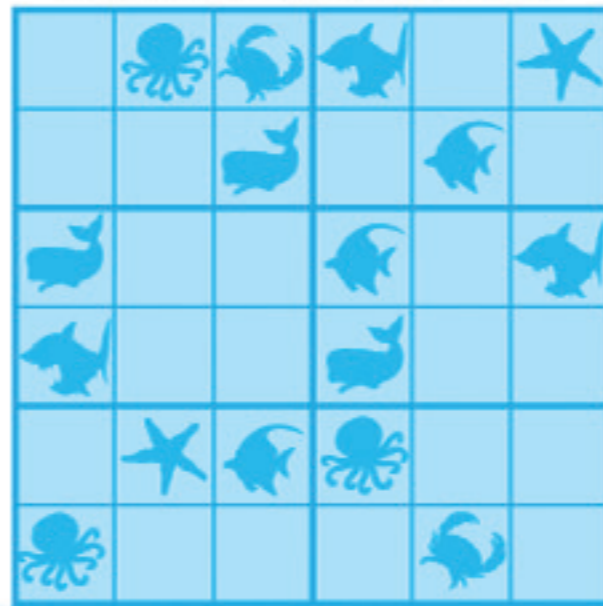

Look out for more fun every month in NATIONAL GEOGRAPHIC Kids magazine!

### Sea-life sudoku

Fill the grid so that each row, column and mini-grid contains all of these symbols

### Island maze

Can you help Nim through the maze to find Selkie the sea lion?

## Amazing ISLAND

Nim is an 11-year-old girl living with her scientist father on a tropical island in the South Pacific Ocean. But when her dad is lost at sea on a sinking ship, Nim finds herself battling tourists who want to take over the island. So she has to rely on her animal pals to save her home!

Nim's best friends are an Australian sea lion, Selkie, and a bearded lizard called Fred. To help Nim scare off the tourists, Fred bares his teeth, spreads his spiked mane and hisses aggressively at them. And it works – they go running in the opposite direction! Selkie, on the other flipper, helps out by letting Nim ride on his back through the ocean, to help her search for her dad. Good luck, Nim!

Nim knows Selkie's a friend she can lean on

Whale of a wordsearch

Island maze

Spot the difference  
On the second image there is a missing polar bear, a missing shark, a missing turtle, the sea plane is smaller, the starfish is yellow instead of orange, and the pirate ship is facing the opposite direction.

Water world  
Across: 2. Blue  
5. Currents  
6. Arctic & Oil  
9. Reefs & Tides  
Down: 1. Weather  
3. Pacific & Migrates  
7. Alaska
